Купить, заказать диодные лазерные сборки, диодные матрицы, универсальные манипулы, ручки для диодных лазеров для эпиляции. Продажа запчастей и комплектующих для лазеров в России и СНГ.

Продажа матрицы для диодного лазера любого типа. Вы можете заказать диодные сборки (выбор по мощности,барам)и другие запчасти и комплектующие для ремонта и восстановления работоспособности диодного лазера . Универсальные манипулы на диодный лазер. Ремонт лазеров и оборудования для диодной эпиляции.

Мы **предлагаем** под заказ **диодные лазерные сборки** , универсальные манипулы для аппаратов диодной эпиляции. Мы можем поставить с доставкой комплектующие и запасные части для любых диодных и гибридных лазеров, диодных лазеров с вакуумным усилением и аппаратов для эпиляции: Kiers 144, Kiers 145, D-las, FG-2000B, DPSS, SHR BL1, Wingderm, SL 600, SL 500, DL-07, FG2000D, SDL-C, Ruikd, LD4, Silvano, Esteban+ **и других марок**.

ДОСТАВКА ПО РОССИИ И СТРАНАМ СНГ. Различные виды оплаты.

ПРОДАЖА диодных лазеров в следующем разделе сайта .

ДЛЯ ЗАКАЗА и консультаций по **диодным сборкам** электронная почта Gnenik_roman@mail.ru **телефон** (вотсапп,телеграмм) +7 (918) 0110-234(Роман).

Ниже ознакомительная информация по устройству диодных манипул, видам диодных сборок, проблемам диодных лазеров. Множество фотографий с ремонта и новым запчастям и комплектующим для диодного лазера. Если Вас интересует какой то вопрос, то Вы можете проконсультироваться.

Диодная матрица состоит из диодных стэков. **Сборки лазерных** диодов (также называемые массивом **лазерных** излучателей, стеками или матрицами) состоят из определённого числа **диодных лазерных** сборок или баров, которые образуют единый излучающий массив. Наиболее распространённым расположением баров является вертикальное расположение,

Diode Laser modules voor Ontharing

Módulos de Laser de Diodo para a Remoção Do Cabelo LSKCSH

Diode Laser Module für Haar Entfernung

Modules Laser à Diode LSKCSH pour épilation

Особенности:

1. Диодный лазерный модуль состоит из диодного лазерного массива и диодного лазерного драйвера.

2. Диодный лазерный модуль с защитным окном.

3. Симметричный луч

4. Простое водяное охлаждение и отсутствие высокого давления и воды высокого качества

5. Полностью герметичный и заполненный азотом, с сильной экологической адаптируемостью и высокой стабильностью;

6. Прямоугольный симметричный точечный выход, высокая плотность энергии, легко формируется;

7. Окно покрыто Антибликовой Пленкой для уменьшения потери мощности;

8. Структура рассеивания тепла макро-канала, простое водяное охлаждение;

9. Плата привода интегрирована и обладает высокой выходной стабильностью.

Технические характеристики:

Тип: GTHM-500

Пиковая мощность на выходе: 500 Вт

Максимальный рабочий ток: 50A

Максимальная ширина импульса: 400 мс

Максимальный рабочий цикл: 40%

Длина волны: 780-820 нм, 900- 980 нм Спецификация

808nm High Power Diode Laser Hair Removal Handle Piece Demo.

Conductively Cooled Package (CCP) vertical laser diode stacks are mainly designed for low duty solid-state pumping. NDL is working hard to improve the optical power density for these stacks to get max output power within a limited optical window. This kind of laser stack is widely used for Nd:YAG pumping to get high pulse energy in QCW or Pulsed mode.

Features:

QCW laser diode bars with peak power 100W~300W

1~100 bars per stack

Typical 808+/-3nm, other wavelength available

Long life time > 1G Shots

Support custom package design

Fast Axis Collimation: Optional

Duty Circle Limited: <2%, < 5%, < 10%

Micro-Channel Cooler Package (MCCP) is designed for high power CW diode bars up to 60W and 80W. The Micro-Channel Cooler (MCC or MC2) is a high efficiency heat-exchange heatsink. These MCCP package can provide up to >1KW CW output power from a single stack for directly heat treatment for industry, such as metal hardening, laser cladding, welding and etc. It is also widely used for hair removal applications.

Features:

Optical power 60W, 80W or 100W CW per bar

1~20 bars per stack

Vertical & horizontal stacks available

Typical 808+/-3nm, other wavelength (940nm, 976nm)available

Long life time > 10,000 hours

Support custom package design

NDL provides various cooling devices and temperature controllers for lasers, including:

Features:

Peltier (TEC, TE Cooler) Temperature Controller for lasers

Forced Air Cooling Stage for lasers.

Water Cooling Stage for lasers

Laser Water Chiller

Support high operation temperature up to 380°C

SMA-905, ST, FC/PC connectors for patch cords

Collimation or focus head available
